

## MCT PUC

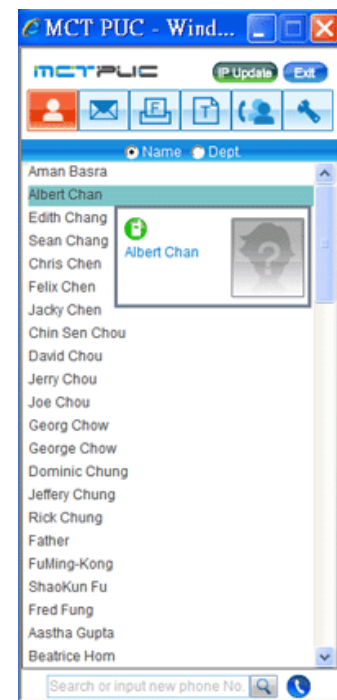

### Cost Effective, Easy Use & Management UC Productivity Application Suite

MCT PUC provides multiple UC applications, including Unified Message, Click-to-Call, Meeting Genie and Message Broadcasting, via a friendly and intuitive web portal user interface to enhance productivity, mobility and use experience of enterprise staff. The web based appliance is seamlessly integrated with IP PBX for plug and play. It is designed for simple and easy use, administration and maintenance and provides a quick investment return to enterprises.

In addition, MCT also provides optional applications, such as speech enabled Auto Attendant and Auto Dialer, IP Recording and Phone Accounting, to meet the requirement of enterprise. By adopting the state-of-art Automatic Speech Recognition (ASR) and Text To Speech (TTS) technology, it provides 24x7 non-stop services to enhance enterprise employees' productivity, mobility and customers' service quality in a friendly and efficient way. It is the ultimate application suite for business communication as well as the most worthy investment for enterprises.
